

## Join the most powerful private internet in iGaming

The Gaming Exchange is an exclusive exchange for Continent 8 customers to connect to other Continent 8 customers. The service provides a VPN across Continent 8's backbone network, in conjunction with third party circuits, to allow Customer to exchange traffic with other participating customers by utilising a BGP Broadcast network between advertised Continent 8 ASN.

### Why connect to the Gaming Exchange?

#### **Lowest latency and highest performance guaranteed.**

Guaranteed local and remote reachability.

#### **Private and reliable internet.**

Private connectivity with public IPv4 addressing, with an uptime rate in excess of 99.9%.

#### **Highly secure ecosystem.**

Private internet, not attackable externally and protected by Continent 8.

#### **Gaming Exchange portal.**

Access to a portal showing traffic flows within and outside Continent 8 to other gaming partners.

The service is presented as 1Gbps Ethernet with speed increments from 1Mbps to 1Gbps as agreed. The Service is full duplex, which means that the full contracted commitment level of the Service can be used for traffic in both directions. Bursting beyond contracted commitment level is available.
