Continent 8's award winning Co-Location hosting services enable online businesses to host their physical infrastructure within our global network of secure and fully resilient world class data centres. Benefit from industry leading connectivity and cybersecurity services to complement platform hosting whether physical or virtual.

Why Continent 8?

Global network: Over 100 fully interconnected locations across Europe, the Americas and Asia. Within the US alone, Continent 8 is in every regulated jurisdiction, with multiple sites in numerous states providing secondary site hosting options.

First-to-market: We hold all necessary vendor licenses and have been successful in supporting first-to-market strategies for the industry's largest brands. We have expertise in understanding the regulations per jurisdiction.

Unrivalled connectivity: All our data centres are interconnected via our global MPLS backbone network using our resilient, high-capacity, diverse connectivity, providing the agility and scale needed by today's online businesses.

All-encompassing provider: As a single supplier, our hosting, connectivity and security solutions provide you with an end to end technical and commercial framework to operate seamlessly across multiple sites.

Commodity cloud: We have the ability to provide physical hosting for commodity cloud stacks and deliver high availability private and public connectivity back to the Cloud provider of your choice.

Benefits

Continent 8's purpose-built data centres provide the following benefits to ensure the **highest levels of availability**:

- Resilient (N+1) power and cooling infrastructure with full environmental monitoring.
- Fully secure with security personnel, CCTV surveillance and physical access controls.
- 24/7 remote hands Technical Support with jumper teams available in multiple locations for faster deployment.
- ISO & PCI certified sites.

AWS Outpost hosting capability in a number of global sites with existing high-density rack power and private connectivity.

We can provide rapid, cost-effective customer deployments on **Public Cloud** platforms in these locations and also **Private Cloud** solution which are built to customers' technical requirements.

Vast suite of connectivity and cybersecurity solutions to complement colocation hosting services.
