

Periodic Vulnerability Assessment & Penetration Testing (VAPT)

Enterprise-Level Security Assessments

Continent 8's periodic Vulnerability Assessment & Penetration Testing services provide comprehensive security assessments for your organisation's infrastructure and applications; helping organisations achieve **regulatory compliance** and/or **understand their attack surface area**, providing a **strong foundation for strengthening security posture**.

Leveraging more than **40 years** worth of collective experience, our experts have the proven pedigree to thoroughly assess your infrastructure and applications, identify risks, and provide guidance. Our consultants include prominent **ex-Blackhat hackers** and **advisors to federal agencies**. They hold prestigious certifications like **CEH and CISSP** and have conducted successful engagements for major enterprises across industries like gaming, finance, technology, and healthcare.

Highlights

- Manual and automated testing combines for comprehensive vulnerability coverage
- Testing of authentication, session management, business logic, and data validation
